DETAILED ACTION

The indicated allowability of claims 33-36 is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 33-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The exact structure of the claimed invention is not clearly recited. Specifically, in claims 33 and 34, what is the exact configuration of the ferroelectric element, and by what means is the atom shifted to the different positions? Are the atoms in stabilized positions after being shifted?

In claim 35, are the first, second, third and fourth electrodes formed on the ferroelectric element? What is the operation of the ferroelectric element that actually results in the storage of the two bits in the memory cell? That is, are any atoms shifted to stabilized positions by way of the four electrodes, and, how do the four separate electrodes operate to bias the respective field effect transistors?

Allowable Subject Matter

Claims 1-30 stand allowed.
